Reviewing Material Frequently

A student who does not review material can forget 80% of what has been learned in only two weeks! The first review should come very shortly after the material was first presented and studied. Reviewing early acts as a safeguard against forgetting and helps you remember far longer. Frequent reviews throughout the course will bring rewards at test time and will alleviate pre-test anxiety.

Equipping Your Study Area With All the Materials You Need

Your study desk or table should be equipped with all the materials you might need to complete the assignment, e.g., pencils, pens, erasers, paper clips, stapler, dictionary, snacks, and liquid refreshments, etc. For some assignments, you may require a calculator or other supplies. With your materials at hand, you can study without interruption. Taking your snack food and drinks to the study location will eliminate those endless trips to the kitchen which break your concentration.

Not Depending on Tests/Exams for Motivation

Can you imagine an athlete-in-training waiting for inspiration to strike to practice in preparation for an event? Of course not. They train daily to stay competitive whether they want to or not. Like the athlete, you must get in training for tests and examinations by doing the assignments and preparing daily through review to be ready for the action.

Keeping a Well-Kept Notebook Improves Grades

There is definitely a relationship between orderliness and high grades. Knowing where to find your materials when you need them is crucial. Keep a special section for each subject in your notebook as well as a calendar so that you can write down all important assignments as they are announced. Having all of this information together in one place is vital to your success. A well-kept notebook is a part of good time management. If you've ever misplaced an important assignment, you know how much valuable time can be lost looking for it.

Keeping a Careful Record of Assignments

Put it down in black and white—including the details—and keep it in your notebook. Knowing just what you are expected to do and when you are expected to do it is the first giant step toward completing important assignments successfully and on time.

<p>SET YOURSELF UP FOR SUCCESS</p> <p>TAKE RESPONSIBILITY</p> <p>All the study methods in the world won't help you if you don't help yourself. As with most everything in your life, your motto should be, "I'm responsible for my success!"</p> <p>If you put forth the effort to study effectively, the improved skills will soon become a habit and be just as natural as breathing. The result can be better grades, greater knowledge, and higher self-esteem. These skills will also serve you well in your personal life.</p> <p>STUDY EFFECTIVELY</p> <p>Studying effectively is not a matter of chance. Students usually devote a lot of time to their studies but they achieve success only by forming correct study habits. By following the methods given below the students learn more easily, retain material for longer periods of time, and save themselves hours of study time.</p> <p>Making and Keeping a Study Schedule</p> <p>Set aside certain hours of each day for study just as you do for nourishment and sleep. Keep the same schedule faithfully from day-to-day. The amount of time needed for study will vary for each student based on skills with the subject matter. An average of two to three hours of study each day is recommended. Make a weekly timetable. Have short frequent periods for each subject rather than long hours for one. Start with interesting easy lessons / topics and then proceed towards difficult ones.</p> <p>Studying in an Appropriate Setting — Same Time, Same Place, Every Day</p> <p>If concentration is your problem, then the right surroundings will help you greatly. Your study desk or table should be in a quiet place – free from as many distractions as possible. You will concentrate better when you study in the same place every day. It's a mind-set. For example, when you sit down at the kitchen table, you expect to eat. When you sit down in an easy chair, you watch TV, etc. Developing the habit of studying in the same place at the same time every day will improve your concentration.</p> <p>Equipping Your Study Area With All the Materials You Need</p> <p>Your study desk or table should be equipped with all the materials you</p>	<p>might need to complete the assignment, e.g., pencils, pens, erasers, paper clips, stapler, dictionary, snacks, and liquid refreshments, etc. For some assignments, you may require a calculator or other supplies. With your materials at hand, you can study without interruption. Taking your snack food and drinks to the study location will eliminate those endless trips to the kitchen which break your concentration.</p> <p>Not Depending on Tests/Exams for Motivation</p> <p>Can you imagine an athlete-in-training waiting for inspiration to strike to practice in preparation for an event? Of course not. They train daily to stay competitive whether they want to or not. Like the athlete, you must get in training for tests and examinations by doing the assignments and preparing daily through review to be ready for the action.</p> <p>Keeping a Well-Kept Notebook Improves Grades</p> <p>There is definitely a relationship between orderliness and high grades. Knowing where to find your materials when you need them is crucial. Keep a special section for each subject in your notebook as well as a calendar so that you can write down all important assignments as they are announced. Having all of this information together in one place is vital to your success. A well-kept notebook is a part of good time management. If you've ever misplaced an important assignment, you know how much valuable time can be lost looking for it.</p> <p>Keeping a Careful Record of Assignments</p> <p>Put it down in black and white—including the details—and keep it in your notebook. Knowing just what you are expected to do and when you are expected to do it is the first giant step toward completing important assignments successfully and on time.</p> <p>Reviewing Material Frequently</p> <p>A student who does not review material can forget 80% of what has been learned in only two weeks! The first review should come very shortly after the material was first presented and studied. Reviewing early acts as a safeguard against forgetting and helps you remember far longer. Frequent reviews throughout the course will bring rewards at test time and will alleviate pre-test anxiety.</p>
